

MATERIAL PROCUREMENT SIMPLIFIED

AECInspire is a smart and intuitive cloud solution that verifies project specifications, generates comprehensive bill-of-materials (BOM), orders & tracks project materials and integrates closely with suppliers to improve site logistics.

AECInspire enables AEC professionals to truly unlock the potential of BIM and project data to better utilize the information across project lifecycles.

Project teams can easily access, analyze, share, and sync building information to improve the tedious procurement process.

Why AECInspire?

AECInspire aims to improve labor productivity, specifically targeting the cumbersome material ordering and supply chain processes. It saves time, cost and reduces errors through supplier database integration.

- Verifies materials based on project specification and building codes.
- Generates installation Bill-of-Materials from 3D models or 2D drawings.
- Integrates with suppliers' catalogs and procurement systems.
